

Ms. Christine Wilson (2016 – 2018 Batch)

Christine did her Master of Science in Life Science during 2016 – 2018. She is the recipient of best out going student in M. Sc. Life Science, 2018. She has cleared her NET Lectureship (Life Science) with an All India Rank 32, June 2018.

She had an inclination towards research which is evident from her internship at Jawaharlal Nehru Centre for Advanced Scientific Research (JNCASR), Jakkur, Bengaluru, (July 2018 to date) at the Behavioral Neurogenetics Laboratory, Neuroscience Unit. She is working on understanding the influence of autophagy genes on sleep/wake behavior in *Drosophila melanogaster*, through neurogenetic techniques, by behavioral and molecular analysis.

Completed a two-month summer internship, at Jawaharlal Nehru Centre for Advanced Scientific Research (JNCASR), Jakkur, Bengaluru. (April to June 2017). Worked in the Behavioral Neurogenetics Laboratory, Neuroscience Unit (NSU). Gained experience working with *Drosophila* as a model organism and using RNAi lines of *Drosophila* in behavioral and chronobiological studies.
