Institutional Social Responsibility Cell(I S R C) & PG Department of Management Studies

Book Publication under Akshara Project

Concept

‘Each one Teach One ‘is a key area of our Institutional Social Responsibility Cell. Being an educational institution with over 7000 students, the scope to reach out to students from various Government schools is vast. As a part of this initiative the students of PG Department of Management Studies have developed content for enhancing the reading ability of children from standard one onwards. The book has been designed to introduce them to gain confidence in reading.

Trial

The content has been tried in two Government schools in our vicinity for over two years. The concept of identifying capital and small letters, reading words which are frequently used, followed by sentences using the same set of words would make a child fluent in reading. Further introduced to reading library books.

The Institutional Social Responsibility Cell also maintains a kids library for Government School children. These books are taken to the schools to enhance reading ability.

Outcome

Outcome of this project has been remarkable. The joy of building confidence in reading has ensured they develop curiosity in other subjects of interest. Keeping this in mind we would like to publish a book. Which would be given to each child to practice reading at school and at home.

Target Students from various Government schools would be reached out through our students as part of community activity. Students who knows to read but is not fluent in reading will be taught to read fluently.
