

	<b>Program :</b>	<b>BA - History, Economics, Political Science (HEP)</b>		
	<b>HISTORY</b>			
	<b>PO Code</b>	<b>Programme Outcomes:</b>		
	PO1	To equip students with a wholesome, inter disciplinary perspective of the societies they inhabit; to emphasise the relevance of the social sciences in combating local and global problems; and to most importantly shape students into humane and conscientious individuals.		
<b>Semester</b>	<b>Course Code</b>	<b>Course Name</b>	<b>CO Code</b>	<b>Course Outcomes</b>
I	HI11A	India Earliest Times to the 12th Century	CO1	It provides an overview of the ancient civilization of India and their role in laying a foundation to our culture
	HI11A	India Earliest Times to the 12th Century	CO2	The student will be able to appreciate about how India was a crucible of a number of races and religions.
	HI11A	India Earliest Times to the 12th Century	CO3	The student will acquaint themselves with the various developments such as political conditions, agrarian developments and urbanization trends in India's early history and their contribution in shaping our society.
	HI11A	India Earliest Times to the 12th Century	CO4	It familiarizes the students with the art and architecture that flourished in ancient days.
II	HI21A	India -12th Century to 18th Century	CO1	The students will understand the changes that took place in the political, economic and social conditions of India from the 12th to 18th century
	HI21A	India -12th Century to 18th Century	CO2	It provides a vibrant picture of a massive exchange of ideas, culture and language over a period of five hundred years
	HI21A	India -12th Century to 18th Century	CO3	The students will have a broad overview of the interactions, accommodations and hostility

				that played a role in shaping the medieval society.
	HI2IA	India -12th Century to 18th Century	CO4	The students will be able to analyze the interaction between the Indian and Islamic architectural traditions that resulted in a new synthesis of architectural styles.
III	HI3EHPP A	History of Prominent Personalities	CO1	This paper provides students a platform to study, analyze and critically evaluate the life and careers of prominent personalities from around the world.
	HI3EHPP A	History of Prominent Personalities	CO2	As these personalities have been drawn from multi layered nations, their image, the magnitude of their lives and career in history will help arouse consciousness among students in varying degrees
	HI3EHPP A	History of Prominent Personalities	CO3	It will also help the students to begin to explore with kindle of hopes of finding out more!
IV - Elective	HI4EWIH A	The Women in Indian History	CO1	This paper acts as a lens into the status of Indian women in Hinduism, Jainism, Buddhism and Islam. It analyzes their role as defined by patriarchy, culture and tradition.
	HI4EWIH A	The Women in Indian History	CO2	It also explores the contributions made by women reformers, revolutionaries, administrators and also studies lives of lesser women from different walks of life in India. It intensifies and exemplifies the numerous issues women faced.
	HI4EWIH A	The Women in Indian History	CO3	It helps students to understand the cleavages of caste and the assault of the colonial process which changed the lives of Indian women. It makes students aware that history is no longer just a chronicle of kings and statesmen and asserts that women have a history!!

IV - Elective	HI4EHCJ A	History of Modern China and Japan Since 1900	CO1	This course introduces students to the shared history and contemporary relations of two of the most powerful countries in the world, China and Japan.
	HI4EHCJ A	History of Modern China and Japan Since 1900	CO2	The student will have an understanding of the revolutions and reforms of the 20th century which have shaped the development of China.
	HI4EHCJ A	History of Modern China and Japan Since 1900	CO3	The student will be able to demonstrate an understanding of the political, social, and economic development of Japan.
	HI4EHCJ A	History of Modern China and Japan Since 1900	CO4	The student will study the post-war reforms, economic recovery and the role of Japan in the current international arena.
V	HI5HMI A	History of Modern India	CO1	The student will be able to appreciate the nuance of the historical process through which Modern Indian Politics and Society has emerged.
	HI5HMI A	History of Modern India	CO2	The student will analyze Colonialism, Imperialism and growth of Nationalism in India.
	HI5HMI A	History of Modern India	CO3	The student will demonstrate an understanding of the major Political, Economic and Social changes and developments that have shaped the present.
	HI5HMI A	History of Modern India	CO4	The student will have an understanding of the various movements that took place during the British rule against exploitation and oppression
V - Elective	HI5ECIA	Conflicts and Integration-20th Century World	CO1	To enable students to understand and analyze the era of armed peace before World War I
	HI5ECIA	Conflicts and Integration-20th Century World	CO2	To analyze the conflicts of the twentieth century that were rooted in Europe and U.S.A.
	HI5ECIA	Conflicts and Integration-20th Century World	CO3	The student will be able to understand how the I World War led to the emergence of an international peace keeping organization

	HI5ECIA	Conflicts and Integration- 20th Century World	CO4	An insight into the Russian Revolution, its impact and the lives of dictators
V - Elective	HI5ERRE A	Reforms and Revolutions in Europe	CO1	To provide the students with the basic contours of Modern Europe
	HI5ERRE A	Reforms and Revolutions in Europe	CO2	The student will analyze the tension that has shaped European Society during the Renaissance and Reformation period in Europe
	HI5ERRE A	Reforms and Revolutions in Europe	CO3	They will be able demonstrate an understanding of how the geographical and economic expansion of Western countries from the 16th century has led to the formation of colonial empires in the 19th century
	HI5ERRE A	Reforms and Revolutions in Europe	CO4	The study of European history provides the students with crucial insight into the underpinnings of social, cultural, and economic development.
	HI5ERRE A	Reforms and Revolutions in Europe	CO5	The study will enable students to understand the growth of Nationalism and its impact on Europe
VI	HI6IIA	India After Independence	CO1	The student will be able to recognize the multifaceted process of change that took place after independence.
	HI6IIA	India After Independence	CO2	The student will develop the ability to analyze issues such as politics linguistic identities, gender inequality and other development challenges in India.
	HI6IIA	India After Independence	CO3	It will help the students to be aware of the socio political dynamics at play in contemporary India and keep themselves abreast with current affairs and debates in the country
	HI6IIA	India After Independence	CO4	It will enable the students to analyze India's Foreign policy
VI - Elective	HI6ECW A	Contemporary World	CO1	The student will be able to analyze the Post World War issues like cold war,

				disarmament and Non – Alignment.
	HI6ECW A	Contemporary World	CO2	The student will demonstrate a broad understanding of the major political events and economic forces of Asia and Africa.
	HI6ECW A	Contemporary World	CO3	It will help the students to be aware of the issues and challenges faced by the world in the 20th century
	HI6ECW A	Contemporary World	CO4	The students will be able to analyze the impact of the fall of Soviet Union and emergence of Uni polar world.
VI - Elective	HI6EEA	20th Century Europe	CO1	This paper provides students with an insight into the historical perspective of 20th Century Europe.
	HI6EEA	20th Century Europe	CO2	The focus initially is on the era of armed peace that preceded the outbreak of World War I, the outbreak of the Russian Revolution and the peace settlements.
	HI6EEA	20th Century Europe	CO3	They get to interpret factors that led to the rise of dictators in Europe and how they went on to create a bigger catastrophe: World War II.
	HI6EEA	20th Century Europe	CO4	They also get to learn about the emergence of two super powers: something new in international politics and resulting Cold War. Students get to analyze the role of USA between the two World Wars. The disruption of USSR and its impact
	<b>ECONOMICS:</b>			
	<b>PO Code</b>	<b>Programme Outcomes:</b>		
	PO1	To understand basic concepts of economics and able to analyse economic behaviour in practice.		

	PO2	Provide opportunity to learn alternative approaches to economic problems through practical exposure to curriculum in allied fields.		
<b>Semester</b>	<b>Course Code</b>	<b>Course Name</b>	<b>CO Code</b>	<b>Course Outcomes</b>
I Semester	ECO1MIEA	Microeconomics	CO1	Understand the nature, scope and approaches of Economics , Economic system and Economic problems.
	ECO1MIEA	Microeconomics	CO2	Analyze the behavior of market equilibrium with the help of demand and supply and their elasticity's.
	ECO1MIEA	Microeconomics	CO3	Detail understanding of the cardinal utility and ordinal analysis including their consumer's equilibrium
	ECO1MIEA	Microeconomics	CO4	Detail understanding of different laws and types of production function;cCost and Revenue.
	ECO1MIEA	Microeconomics	CO5	understanding of price and output determination of different market structure
	ECO1MIEA	Microeconomics	CO6	Discuss the marginal productivity theory and understand labour market equilibrium.
II Semester	ECA2MEA	Macro Economics	CO1	To gain an understanding of macroeconomics basics; national income's concept ,its measurement, problems and significance including circular flow of income.
	ECA2MEA	Macro Economics	CO2	Detail discussion of various theories of employment and consumption including the concepts of saving.
	ECA2MEA	Macro Economics	CO3	To become familiar with the concept of investment and Income determination, multiplier, accelerator, super multiplier including IS-LM Model.
	ECA2MEA	Macro Economics	CO4	To study inflation, deflation and its type; and quantity theories of money

III Semester	ECA3FPE A	Financial and Public Economics	CO1	Understand the concepts of monetary theory, financial system and banking, finance Institutions & financial markets.
	ECA3FPE A	Financial and Public Economics	CO2	Analyse the basic concepts of banking system, the principles of Commercial & Central banks and working of monetary policy.
	ECA3FPE A	Financial and Public Economics	CO3	Understanding theories of taxation, regulation, incidence and canons of taxation.
	ECA3FPE A	Financial and Public Economics	CO4	Exposure to the principles and problems relating to the allocation of public expenditure, public debts & Budget.
IV Semester	ECA4IEA	International Economics	CO1	Understand the basics of International Trade, its tool and theories, concept and numerical based on terms of trade.
	ECA4IEA	International Economics	CO2	Analyse free trade and protectionist policy
	ECA4IEA	International Economics	CO3	Understand the concept of capital movements across borders, the role of MNCs on economic development
	ECA4IEA	International Economics	CO4	Understanding of Economic integration, its types and their effects
	ECA4IEA	International Economics	CO5	Acquire knowledge about meaning and structure of BOP, its problem and solutions, exchange rate system, its types and their theories
V Semester - Compulsory	ECA5IBS A	Introduction to Basic Statistics	CO1	Explain basic statistical concepts, methods of statistical data collection, and graphical representation of data
	ECA5IBS A	Introduction to Basic Statistics	CO2	Introduce measures of central tendency, how to calculate and apply
	ECA5IBS A	Introduction to Basic Statistics	CO3	Detail understanding of measures of dispersion with theory, properties and numerical
	ECA5IBS A	Introduction to Basic Statistics	CO4	Understanding the concepts of moments, skewness, kurtosis and its meaning and types.

	ECA5IBS A	Introduction to Basic Statistics	CO5	Introduce the Index number through theoretical, numerical and application
	ECA5IBS A	Introduction to Basic Statistics	CO6	Compute and interpret the results of correlation and regression analysis and time series analysis
V Semester - Elective	ECA5EM REA	Marketing & Retail Economics	CO1	Understand the concepts of marketing and the role of marketing in business and society and introduce the students to the basic tenets of marketing and its applications.
	ECA5EM REA	Marketing & Retail Economics	CO2	Ability to develop marketing strategies based on product, price, place and promotion objectives.
	ECA5EM REA	Marketing & Retail Economics	CO3	Ability to communicate the unique marketing mixes and selling propositions for specific product offerings and formulate marketing strategies that incorporate psychological and sociological factors which influence consumers.
	ECA5EM REA	Marketing & Retail Economics	CO4	Make students understand basic concepts and the functioning of the organized retail sector and highlight its importance.
	ECA5EM REA	Marketing & Retail Economics	CO5	Familiarize them with the latest technology and advancement in retail sector in India.
	ECA5EM REA	Marketing & Retail Economics	CO6	An understanding of the benefits delivered by CRM, the contexts in which it is used, the technologies that are deployed and how it can be implemented.
	V Semester - Elective	ECA5EEE IA	Environmental Economics I	CO1
ECA5EEE IA		Environmental Economics I	CO2	Identify the trade-off between development and sustainability using various concepts, principles, approaches and quantifiable indicators

	ECA5EEE IA	Environmental Economics I	CO3	Discuss the existing literature on global and Indian environmental complexities along with identifying policy options to solve the issues.
	ECA5EEE IA	Environmental Economics I	CO4	Enable an understanding of environmental market efficiency through Utility Function, Social Welfare Function and Pareto Efficiency
	ECA5EEE IA	Environmental Economics I	CO5	Classify goods based on the attributes and explore the relationship between markets and market failure along with valuation of non-marketed goods.
V Semester - Elective	ECA5EBF SA	Banking & Financial Services	CO1	Acquire the capacity to integrate broad and coherent knowledge of the financial system.
	ECA5EBF SA	Banking & Financial Services	CO2	Exhibit an awareness of the theoretical setting of Indian Banking System and comprehend information related to current structure, reforms and changing banking practices.
	ECA5EBF SA	Banking & Financial Services	CO3	Generate an ability to critically analyze and evaluate banking and financial policies, create strategies, provide technical advice & ideas to promote financial products in urban and rural areas.
	ECA5EBF SA	Banking & Financial Services	CO4	Illustrate the capacity to integrate technical and conceptual framework of financial evaluation, accounting and reporting of fund based financial services.
	ECA5EBF SA	Banking & Financial Services	CO5	Exercise informed knowledge on legal aspects and financial pattern of various fee based financial services.
V Semester- Elective	ECA5EM AEA	Mathematical Economics	CO1	Introducing the students to all types of basic mathematical functions and functions used in Economics and different methods to solve those functions.

	ECA5EM AEA	Mathematical Economics	CO2	Application of simple and simultaneous equation in the context of market equilibrium analysis and interest compounding.
	ECA5EM AEA	Mathematical Economics	CO3	Understanding the meaning & rules of differentiation in detail.
	ECA5EM AEA	Mathematical Economics	CO4	Application of differential calculus to different concepts of consumer behavior theory, production and cost
	ECA5EM AEA	Mathematical Economics	CO5	Identifying the stability condition and solution to different market equilibrium problems, problems of taxation and subsidy in different markets.
	ECA5EM AEA	Mathematical Economics	CO6	Understanding the basic rules of integration and application of the concept of integration in some economic concepts.
	ECA5EM AEA	Mathematical Economics	CO7	Introducing the concept of determinants and matrices in detail and using the concepts to solve multivariate simultaneous equations
VI Semester	ECA6EDI EA	Economics of Development & Indian Economy	CO1	Demonstrate understanding of conceptual framework of development and number of contemporary macro development issues and policies in varying local and global contexts.
	ECA6EDI EA	Economics of Development & Indian Economy	CO2	Identify and examine various approaches of key development economic theories and their policy implications.
	ECA6EDI EA	Economics of Development & Indian Economy	CO3	Critically analyse, synthesize and reflect upon the pattern, challenges of and strategies for the migration and population growth using the empirical evidence.
	ECA6EDI EA	Economics of Development & Indian Economy	CO4	Evaluate the intent and outcomes of government policies designed to strengthen agriculture and rural development in India using economic problem solving skills.

	ECA6EDI EA	Economics of Development & Indian Economy	CO5	Demonstrate comprehensive understanding of changing economic scenario since 1991 and develop skills to evaluate major policy initiatives and reforms in Indian Economy.
VI Semester- Elective	ECA6EEE A	Environmental Economics - II	CO1	Examine the tools used for valuing environmental goods and understand the concept of green accounting
	ECA6EEE A	Environmental Economics - II	CO2	Describing the methodologies used for valuing non-marketed environmental goods and also highlight the differences between various valuing methodologies using case studies
	ECA6EEE A	Environmental Economics - II	CO3	Understanding and calculating the concept of Marginal User cost, economic rent, growth and extraction models of non-renewable resources
	ECA6EEE A	Environmental Economics - II	CO4	Explaining the set of economic instruments available for implementing an economic incentives approach to natural resource management in developing and developed countries.
	ECA6EEE A	Environmental Economics - II	CO5	Describing the importance and objectives of various national-level institutions involved in environmental regulation in India
VI Semester- Elective	ECA6EN ECA	Entrepreneurship & New Enterprise Creation	CO1	Enable the students to understand the fundamental concepts and theoretical base of Entrepreneurship.
	ECA6EN ECA	Entrepreneurship & New Enterprise Creation	CO2	Identify existing business opportunity and its evaluation
	ECA6EN ECA	Entrepreneurship & New Enterprise Creation	CO3	Understand the concept of business plan and apply appropriate framework for writing a business plan
	ECA6EN ECA	Entrepreneurship & New Enterprise Creation	CO4	Demonstrate awareness about the EDP programmes and sources of finance for business

	ECA6EN ECA	Entrepreneurship & New Enterprise Creation	CO5	Familiarise the growth and exit strategies in business and to analyze, and apply ethics frameworks to corporate social responsibility and ethical decision making
VI Semester- Elective	ECA6EEI A	Economics of Insurance	CO1	Exhibit knowledge of insurance contracts and provisions, economic and legal implications, operation and management of insurance entities.
	ECA6EEI A	Economics of Insurance	CO2	Acquire coherent knowledge on fundamentals of uncertainty and risk and develop skills to comprehend reinsurance pricing and distribution system
	ECA6EEI A	Economics of Insurance	CO3	Demonstrate knowledge on the operation, management and legal aspects of insurance entities as well as the economic implications of insurance industry.
	ECA6EEI A	Economics of Insurance	CO4	Cultivate practical skills to evaluate growth, pricing, principles and legal aspects of life, health and general insurance products.
	ECA6EEI A	Economics of Insurance	CO5	Demonstrate understanding of and appreciation for the importance of impact of wealth accumulation and retirement planning and examine the role of public policy.
VI Semester- Elective	ECA6ES MEA	Advanced Statistical Methods for Economics	CO1	This module will provide the student with an intuitive and practical introduction into Probability Theory that they can apply in any field involving uncertain events occurring.
	ECA6ES MEA	Advanced Statistical Methods for Economics	CO2	The Distribution theory will provide them with the theoretical tools for building probabilistic models of real world phenomena with the help of deriving the Bernoulli, Binomial, Poisson, Geometric, Uniform, and Normal distributions

	ECA6ES MEA	Advanced Statistical Methods for Economics	CO3	Student will get to learn the procedure for drawing a sample and its application.
	ECA6ES MEA	Advanced Statistical Methods for Economics	CO4	The student will be able to know the methodologies employed by the analysts depending on the nature of the data used and the reason for the analysis with some test statistics
	ECA6ES MEA	Advanced Statistical Methods for Economics	CO5	The student can use their ANOVA knowledge for both observational and experimental studies based on their research area.
	ECA6ES MEA	Advanced Statistical Methods for Economics	CO6	Information from the chapter of Vital Statistics can help the student to identify and quantify health-related statistical issues and to measure progress toward quality improvement and public health goals.
	<b>POLITICAL SCIENCE</b>			
	<b>PO Code</b>	<b>Programme Outcomes:</b>		
	PO1	To promote active citizenship and civic consciousness.		
	PO2	· To achieve a high level of academic excellence and value based learning.		
	PO 3	· To develop an inter-disciplinary perspective for strengthening Civil Society.		
	PO4	· To participate in the process of democratization and empowerment at different levels.		
	PO 5	· To develop students' ability to examine political issues critically and analytically.		
	PO 6	· To comprehend the basic structures and Processes of Government systems and theoretical underpinnings.		
	PO 7	· To Analyse political problems, arguments, information, and theories.		

	PO 8	· To Analyse Political and policy problems and formulate policy options.		
	PO 9	· To use electronic and traditional library resources to research key local, state, national and international policy issues and present results.		
Semester	Course Code	Course Name	CO Code	Course Outcomes
I	PLSCICC PSA	Understanding Core Concepts in Political Science	CO1	• To expose students to some basic ideas and core concepts in Political Science and to orient students to the methodological and ideological traditions in Political Science.
	PLSCICC PSA	Understanding Core Concepts in Political Science	CO2	• Demonstrate the ability to apply abstract theory to concrete problems by using ideas of Political theorists to address contemporary social issues and explain the central concepts in Political theory
II	PLSC2PT A	Political Theories	CO1	• To expose students to some basic ideas and core concepts in Political Science and to orient students to the methodological and ideological traditions in Political Science.
	PLSC2PT A	Political Theories	CO2	• Demonstrate the ability to apply abstract theory to concrete problems by using ideas of Political theorists to address contemporary social issues and explain the central concepts in Political theory
III	PLSC3IC A	Indian Constitution- Institutions	CO1	• Comprehend the basis and working of the structures and processes of Indian Governmental system.
	PLSC3IC A	Indian Constitution- Institutions	CO2	• Explain why elections are essential to the democratic process.
IV	PLSC4IC PA	Indian Constitution- Processes	CO1	• Comprehend the basis and working of the structures and processes of Indian Governmental system.
	PLSC4IC PA	Indian Constitution- Processes	CO2	• Explain why elections are essential to the democratic process.

V	PLSC5IP A	Public Administration	CO1	<ul style="list-style-type: none"> <li>Define and analyze key terms, ideas, and concepts of Public Administration and demonstrate an understanding of the interplay of terms, ideas, and concepts in Public Administration</li> </ul>
	PLSC5IP A	Public Administration	CO2	<ul style="list-style-type: none"> <li>Students will be able to lead and manage in public governance and participate in and contribute to the policy process and will be able to analyze, synthesize, think critically, solve problems, and make decisions.</li> </ul>
V	PLSC5EI RA	International Relations	CO1	Discuss the major issues of International Relations and Diplomacy
	PLSC5EI RA	International Relations	CO2	Outline the range of functions performed by various Regional and International Organizations and analyze articles varying complexity on International issues
VI	PLSC6PF AA	Personnel and Financial Administration	CO1	<ul style="list-style-type: none"> <li>Define and analyze key terms, ideas, and concepts of Public Administration and demonstrate an understanding of the interplay of terms, ideas, and concepts in Public Administration</li> </ul>
	PLSC6PF AA	Personnel and Financial Administration	CO2	<ul style="list-style-type: none"> <li>Students will be able to lead and manage in public governance and participate in and contribute to the policy process and will be able to analyze, synthesize, think critically, solve problems, and make decisions.</li> </ul>
VI	PLSC6EII A	International Institutions	CO1	<ul style="list-style-type: none"> <li>Discuss the major issues of International Relations and Diplomacy</li> </ul>
	PLSC6EII A	International Institutions	CO2	<ul style="list-style-type: none"> <li>Outline the range of functions performed by various Regional and International Organizations and analyze articles varying complexity on International issues</li> </ul>
