

ACADEMIC YEAR (2020-2021)
REPORT ON PEDAGOGY OF PHYSICAL SCIENCE

Date: 20-03-2021

Venue: B.Ed Classroom

On 20th of March 2021, the Department of Education, Mount Carmel college had organized an hour session of seminar on the topic ' Pedagogic Content Knowledge of Science'. The guest lecturer for the day was Dr. Ponnambaleswari from R.V regular B.Ed college, she is a renowned guide of PhD in education, with an experience of 20 years in the field of education , addressed the second and third year students of B.Sc- B.Ed regarding the methodologies and teaching techniques that one must practice to be an effective classroom teacher, she delivered to us an insight on how one must have a prior knowledge about what why and how one is rendering the concept to the class, as a educator it is necessary that we must be clear with our objectives before we teach the concept in the class room . She also educated the student teachers about the importance of the 5E model of learning and it's prominence in making the teaching learning session effective. The entire session motivated the student teachers to understand the objectives, systematic methodologies and innovate approaches in order to practice them in future and provide an insightful learning experience. The session was concluded with a vote of thanks given by the student representative. It was a knowledgeable session. Encouraging and guiding the future teachers towards achievement in their future endeavours.
